Abstract (English):

PROBLEM TO BE SOLVED: To provide a container with a label the body part of whose main body secures a sufficient shape keeping characteristic even when the container main body is made light by thinning.

SOLUTION: This container with a label has a shrink label 20 on the body part 11 of a cup shape container main body 10 made of thermoplastic, and is structured with a heat insulating characteristic so that the body part 11 does not become extremely hot even when hot water is poured inside. The outer peripheral body part 11 of the container main body 10 has many longitudinal ribs 11a formed at constant intervals protruding outward, and the top end edge of the body part 11 has a flange part 11b protruding outward in the diameter direction. On the total periphery of the body part 11, an adhesive tape 30 is wound around with tension and is adhered to the tip end of each rib 11a, and by the tape 30 the neighboring ribs 11a are connected to each other.
